

Synopsis for "Preparing Your Child for Primary 1" (KL-P5-2016S)

The transition from pre-school to primary school may be challenging to most parents. The changes in physical, emotional, cognitive and social dimensions would need special attention so that parents could cope with the changes.

In this session, it gives a broad overview of the transition and what parents need to be aware of and be supportive in enabling a smooth transition. It is an exciting journey where your child will discover beyond the academics, his talents and interests that will give him a well-rounded and holistic education in the years to come.
